

EAST VIEW Global Census Archive

In the first offering of its kind, East View presents the **Global Census Archive®** (GCA), an innovative program to collect officially published census-related materials from around the world.

This global collection contains GIS census data as well as all available published volumes, questionnaires and other census ephemera. Each census comes with an East View-produced census catalog, which serves as a finding aid and provides historical context.

WHY GLOBAL CENSUS ARCHIVE?

Data from published census authorities are unusable for systematic analysis because they are locked in thousands of paper documents, PDF files, and rare books dispersed across hundreds of websites and libraries.

Meanwhile, authoritative GIS data output is often not usable without extensive set-up and significant database management and programming experience.

East View provides a centralized publications platform and uniform GIS format for these materials, making a wide range of census assets easily accessible for discovery and analysis.

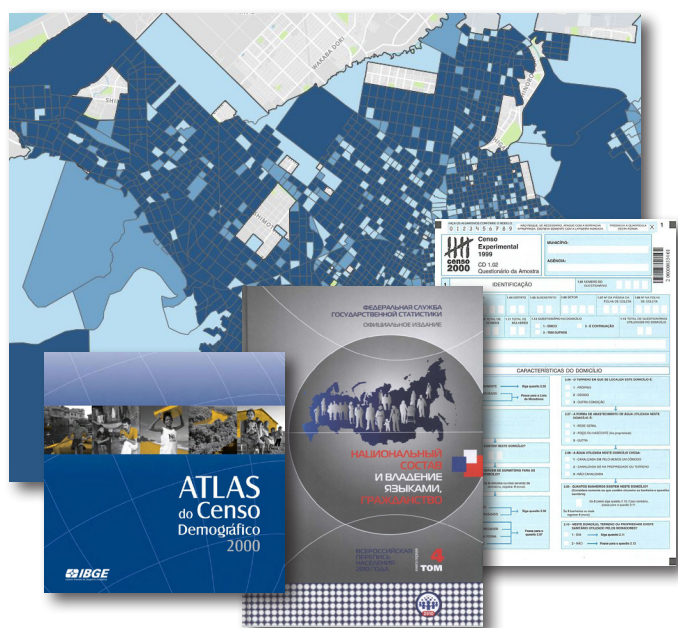

FEATURED COLLECTIONS

Latin America

Features GIS and Publication data for dozens of countries throughout Central and South America. Multiple census years are available for select countries.

100MM+

Features GIS and Publication data for the most recent finalized census for every country with populations of over 100 million people.

GCA DELIVERABLES

GIS Data (GCA-GIS)

East View's GIS census products offer the following:

- **Geodatabase**
 - Intuitive organization of census data
 - Administrative boundary vector data
- **Shapefiles**
 - All vector and census data in ESRI Shapefile format
- **Census Guide**
 - Detailed instructions on how to query and visualize data
 - Detailed descriptions of census variables
- **Original Census Documentation**
 - Delivered in native format
- **Metadata**
 - Full attribute level metadata in FGDC ISO format

Census Publications (GCA-PUBS)

GCA-PUBS provides a centralized platform for published content that accompanies the release of a census. Every census has official authoritative elements that East View aggregates, processes and makes discoverable on an intuitive and easy-to-use platform. While the availability and type of materials will vary by country and census year, examples of typical published materials include:

- Official results (analytical and tabular)
- Questionnaires
- Survey forms
- Maps, atlases
- Methodological and preparatory works
- Public campaign literature
- Newspaper and journal articles
- Conference materials
- Legislative works

In addition, each census publications product is accompanied by an East View-produced census catalog, which serves as a finding aid and provides historical context for the materials.

WANT MORE INFORMATION?

Visit www.eastview.com/gca for more details on available census products or contact us at info@eastview.com.

Note: The data below is a list of currently available GIS census data. GCA-GIS is continually growing, with new countries and census years constantly being sourced. If there is a country you are interested in that does not appear on this list, please contact us to discuss availability and status.
